

DECLARATION

The Regional Energy Trade Union Network of South East Europe (RETUNSEE) has been attentively following the events, causes and consequences of the world economic crisis caused by large banks, funds and multinational companies. During the last two decades and a half, the neoliberal policy has been destroying the framework and rules of a rather successful economic development in Europe and on a larger scale, destroying the achievements of employees and the foundations of the social justice society.

The neoliberal policy has destroyed regulated market and economic trends and advocated for establishment of a new, deregulated, chaotic market economy in the world, free from any control, with one single goal: enhancing profit and wealth on one side only. That resulted in gross impoverishment, lowering of personal and general living standard in the world of labour and employees. Unfortunately, what happened is merciless plundering of national and people's resources.

In these hard times, energy also happens to be targetted by profiteers and various international lobbies, as it is a very appealing share of pie in our region, in Europe and worldwide. To us, energy has been and remains to be a common good, belonging to all citizens and nations of the world, and to them it means profit and profit only, regardless of the consequences!

The Regional Network (RETUNSEE) will confront most fiercely the philosophy of the „chaos economy“ running wild, and it will not allow the burden of the world economic crisis to fall on employees, pensioners and citizens of the world!! We are advocating for positive economic trends and development, for countries, unions of states and the world of social justice, for the world of overall prosperity, human and democratic principles, in the interest of employees, citizens and all nations!

THE GENERAL ASSEMBLY OF RETUNSEE

THIRD REGULAR CONFERENCE

Belgrade, 19-9-2009
